Abhijai Jaiswal

Java Backend Developer

abhijaijaiss@gmail.com | +919508845362 | linkedin.com/in/abhijai-jaiswal-2b5187344 | github.com/abhijai16

SUMMARY

Second-year B.Tech Computer Science student seeking a backend development internship. Strong Java, OOP and data structures foundation (200+ LeetCode problems solved in Java), hands-on experience on a Django/PostgreSQL team project for Smart India Hackathon, and currently learning Spring Boot.

EDUCATION

KIIT University, Bhubaneswar *2025-2029*

B.Tech in Computer Science and Engineering | CGPA: [8.56]

- Coursework: Data Structures, Theory of Computation, Digital Electronics and Verilog HDL, C Programming

TECHNICAL SKILLS

Languages: Java (primary), Python, C, JavaScript, HTML/CSS, SQL

Backend: Django, Django REST Framework, REST APIs, PostgreSQL, SQLite; learning Spring Boot and JPA/Hibernate

Frontend: React, Redux Toolkit, HTML/CSS, JavaScript

Core CS: Data structures and algorithms, OOP, recursion and backtracking, time complexity analysis

Tools: Linux (Arch), psql, Vite

PROJECTS

Quorum: Offline-First Proctored Coding Exam Platform *Django, DRF, PostgreSQL, React*

Smart India Hackathon team project (6 members) | github.com/Mr-cody-77/Assignment-System

- Built a LAN-based exam platform for college labs with unreliable internet: a central Django/DRF/PostgreSQL server plus per-lab worker nodes on SQLite, using mDNS service discovery and offline sync.
- Contributed to the backend, teacher console and frontend (React, Monaco editor, Redux Toolkit).
- Tested across multiple physical machines on a LAN, working through service discovery and firewall issues.

LRU Cache *Java*

- Implemented an LRU cache with O(1) get and put using a doubly linked list and HashMap, the same eviction strategy used by caching layers such as Redis.

Personal Portfolio Website *Vite, JavaScript, CSS*

- Built an interactive portfolio from scratch with a dark burgundy theme, typed headings, and animated ghost cursors in each section.
- Implemented a pixel-art book that opens on click with a page-turn effect, plus an animated thread connecting sections.

PROBLEM SOLVING

- Solved 200+ LeetCode problems in Java across arrays, binary search, two pointers, sliding window, hashing, backtracking, greedy, bit manipulation, strings, linked lists, Stack, Queue and Tree.
- Practicing competitive programming on Codeforces; currently learning Trees and Stack/Queue patterns.
